

John Auger

CEO & Co-Founder

Summary of Experience

John co-founded Operations Associates in 1993. In addition to serving as OA's Principal in charge of Sales and Marketing, John consults for clients in need of Management Consulting and Operations Improvement. Prior to founding Operations Associates, he enjoyed a successful career that began in manufacturing engineering, and progressed through engineering management, operations management, and corporate consulting. John has successfully engineered and subsequently managed the build-out and startup of a variety of different kinds of production equipment. His design experience includes mechanical systems, machining, electrical control systems, pneumatics, hydraulics, safety, as well as the integration of these systems. He has extensive experience in new plant design, construction, and startup, and has acted as the lead in several design-build projects.
